Water & Wastewater Treatment Facility Experience

B & B began working in water and wastewater treatment facilities in the late 1980's. Our project experience includes power systems and control systems installation and has also included systems integration support. Some projects were fully designed by our clients while others were successfully completed through a design/build delivery method. We have been hired as a design consultant by multiple engineering firms at facilities such as Hamilton Pump Station #4, Mont Alto Pump Station, Culbertson Pump Station, and Blakewood Pump Station.

After successfully completing the electrical upgrades to the Beavertown wastewater treatment facility in Snyder County, PA we began working with the design firm on that project as a consultant as well. We have provided electric power and controls service work for facilities such as:

- Huntingdon WWTP
- Hamilton Twp.
- Mercersburg Twp.

We continue to provide regular service support to the following facilities:

- Orbisonia
- McConnellsburg
- Dublin Twp.
- Letterkenny

Below is a list of other facilities we have worked in:

Facility Name

Gettysburg
Dale Summit Transfer Station
Antrim Township
Cassville
Beavertown
Dublin Township
Penns Creek
McConnellsburg Authority
Three Springs, VA
